

DISREGARD PREVIOUS EMAIL THERE IS AN ERROR USE THIS ONE INSTEAD

This introduction is going out to only a few people to whom I owe an advanced look at this new project.

After all the disappointments that 2022 gave us, there were also many successes. Quick Turn rescued us from 8 Minute Trader, and this new program will make up for anyone who lost money in IPC, COTP, AFIN, and others.

I have a lot of people contacting me who are worried about what we all believed to be the most solid and reliable program known as Nova-Tech which is now experiencing major problems and may go away soon. They are looking for a reliable place to deploy their funds and I've found it.

But before I go there let me explain why this is so different and ultra-safe.

- This program has nothing to do with trading.
- This program has nothing to do with crypto speculating.
- This program has been working for over 20 years.
- This program is a real business, not a money game.

Let me explain:

Twenty years ago when the Internet was young a group of very smart people began creating money making programs using this new technology. Adwords is a program that Google created to help marketers get ranked in the search engine. Companies would buy Adwords to rank their products and services high in the search algorithm.

A very smart guy, let's call him Ed, discovered that he could create an "arbitrage" scenario by buying Adwords wholesale from Google and selling them off at a significant profit to online retailers in specific niches. He also discovered that this can be done on Yahoo, Amazon, YouTube, Tik Tok and the rest of the online platforms that use similar advertising technology.

So, Ed began buying Adwords and soon ran out of money. He maxed out his credit cards in order to keep buying Adwords and still ran out of money. So he went to a friend and told him that he had developed a business plan that was fool proof, and asked him to lend him \$10,000 for which he would pay him 50% interest the following month.

The next month he could get his 50% profit or roll it back into the program, and if he wanted it all back he could have it as the cycle had run its course and the liquidity used for the buys had been returned. This was a huge success and he soon had many of his friends buying

had been returned. This was a huge success and he soon had many of his friends buying what came to be known as "packages" and earning 50% each month.

One of the things that Ed discovered is that this program could be scaled to an unlimited size. When you consider the size and reach of the Internet and the limitless niches that exist for retail products and services, it becomes clear very quickly that there are no limits to how much capital can be injected into this plan.

So, after working this program for 20 odd years, Ed decided to take this program public and he created a system that would allow ordinary people as well as online marketers like myself to participate in an active or passive manner. He thought if I can borrow \$10,000 from a friend, maybe if I make the offer equally irresistible to strangers they will join and raise even more capital to execute the program. Well, he was correct and soon started offering the program to a wider audience.

Unfortunately Ed suffered some heart problems and had to slow down so he found a company who would be able to offer this program to the masses and he is now functioning as a consultant for that company as well as their "Master Distributor".

I'm going to visit Ed on Wednesday, Dec. 13th. at his home in Atlanta. Turns out we know many of the same people who many would consider Internet Royalty. Ed is one of those Internet Royalty and has been a public figure with a stellar reputation maintained over many decades. I can tell you from personal experience and having been promoting products and programs online for over 17 years, that is no easy feat, but I'm proud to say I also have been able to maintain a stellar reputation over almost two decades.

I'm inviting you to join me now to secure a position in this early stage of pre-launch before the program goes global very soon. One reason I am jumping the gun a bit is because right now they are making it very inexpensive to get involved, and I expect that will change in the new year. I want you to be able to establish yourself early on because when this gets out everybody in this space will learn about it instantly and if you are not already in, you will be behind the 8-ball as the saying goes.

If you are getting this email you are one of a small group who I know would want to learn about this so that you can invite your inner circle to get an early start.

- Getting started is only \$550
- Commissions are paid out of the \$50. \$25 two tiers deep
- \$500 goes into the program to buy Adwords, etc.
- Commissions paid the next day directly to your crypto wallet
- Scalability is limitless
- Ultra Low Risk project
- Tutorial Videos on the website, super simple process

I urge you to get positioned ASAP with a minimum \$550 so that you can begin to casually inform your inner circle as I'm doing. Once this gets out it will be an avalanche.

inform your inner circle as I'm doing. Once this gets out it will be an avalanche.

I truly believe this program will take the world by storm and I intend to be at the very top of the heap. I hope you will join me. If you recognize this opportunity, don't hesitate. I will begin heavy marketing of this program in January.

If you want to speak with me directly, respond directly to this email and let's arrange a call.
